
upper bound $1/f_\Delta$ (only discovery)
model, measured overheads (a=1.06, c=0.152)
measured, Pfam 38.1 → 38.2
projected, other releases (net additions only)
measured, Infernal one-family removal (check dominates)
overhead ceiling 1/c = 6.6×
37.1 → 37.2, 37.3 → 37.4
37.4 → 38.0
38.0 → 38.1
full rerun (1×)
speedup over a full rerun
fraction of the reference that changed, f_Δ (%)
